
Jubilee Year of Hope 2025

“Pilgrims of Hope”

Each week we will be sharing with you information as you become a Pilgrim of Hope. We will learn more about the logo, the Holy doors and the scenes that are depicted of God’s love and mercy and your amazing passport to journey through the diocese to view the Holy Door replicas as we seek to establish and explore our relationship with God.

Let’s take a look at the logo which reminds us that the pilgrim’s journey is not an individual undertaking but rather a communal journey.

Four Figures: represent humanity from the four corners of the earth, embracing the solidarity and fraternity that unites people

Cross: Sign of our faith which is dynamic and bends towards humanity to offer them the certainty of its presence

Anchor: universal symbol of hope which dips down into the waves giving us security and hope

Waves: which remind us that the pilgrimage of life does not always move in calm waters

The Jubilee calls us to set forth on a journey. For each of us , the journey will be different. The beginning of any journey is when we make the decision to start out and then we set out a plan. The journey will take place gradually as there are various routes to choose from and places to discover. And as always, there are detours that may set us on a new road to a miraculous discovery. When we travel, we do not only change places physically, but we also change ourselves. We do not travel alone. The logo reminds us that our pilgrimage journal is a communal one. Along the way our travelling companions will enrich us with new ways of understanding things and fresh perspectives. Throughout this Jubilee year we will journey together although each of our experiences may be different and unique to our personal restoration.

How will this Jubilee be a year of restoration for you?
